

## Forest Skies Infant schools long term plan

### Year 1

We want a curriculum that does just this Inspires our children to the possibilities and opportunities that are available to them in the outside world by presenting them with wider world view and experiences that they may not have otherwise experienced.

At Forest skies Federation we seek to improve learning through opportunities, challenge and enjoyment. We believe strongly that each hour of each day is an opportunity for a child to learn something new or master a skill. Learning is a process with a start point and from that any number of end points, depending on what a child is learning and what stage of learning they are at. Where learning is at its strongest a child is either developing or mastering new knowledge. Our drive, as a school, is to identify, support and challenge children at all stages of their learning to maximise their individual potentials.

Alongside this we wish to nurture of pupils to grow and succeed within themselves but also as people who are part of our community and society to be mindful and thoughtful of others and have the capacity to thrive beyond their school career. With this in mind as a three school federation the core drivers for our curriculum are possibilities and mindfulness.
